ABOUT THE COMPANY

Delivers road works, infrastructure projects, urban development works, and operational support services through qualified field teams and reliable project resources.

Our approach is built on quality, commitment, and operational efficiency, ensuring that every project is executed in accordance with approved specifications and project requirements.

Professional Field Execution

Qualified personnel and operational expertise ensuring every project meets approved specifications.

Integrated Project Support

Equipment, machinery, and operational support covering all project execution phases.

Flexible Execution

Adaptable to diverse project requirements with efficiency and reliability.

VISION & MISSION

Our Vision

To be a trusted partner in the delivery of road, infrastructure, and urban development projects through quality workmanship, operational excellence, and professional commitment.

OUR MISSION

To provide reliable construction and operational support services through qualified personnel, effective resources, and a strong commitment to quality, safety, and project requirements.

WHY HORIZON INTEGRATION

- Professional field execution
- Qualified personnel & operational expertise
- Integrated project support
- Commitment to quality & safety
- Flexible execution capabilities

OUR VALUES

Our Core Principles

Quality

Delivering work in accordance with approved specifications and industry standards.

Safety

Maintaining safe working environments and protecting people, equipment, and project sites.

Commitment

Fulfilling contractual obligations and meeting project schedules.

Professionalism

Building trusted relationships through responsibility, transparency, and respect.

Efficiency

Utilizing resources and operational capabilities to achieve the best project outcomes.

PERFORMANCE STANDARD

Every project is executed with full coordination between field teams and engineering supervision — from day one through final handover.

What We Deliver

Integrated services covering everything infrastructure projects need — from a single partner.

01

Road & Asphalt Works

Road construction, maintenance, and pavement rehabilitation — asphalt paving, resurfacing, milling, base layers, and road marking works.

02

Infrastructure Works

Civil works supporting infrastructure projects — excavation, backfilling, stormwater drainage, earthworks, and project site preparation.

03

Urban Development Works

Interlock paving, sidewalks, pedestrian pathways, concrete curbs, public spaces, and urban enhancement works.

04

Road Marking & Traffic

Road markings, lane lines, pedestrian crossings, directional arrows, symbols, and parking markings per safety requirements.

05

Operational Fleet & Equipment

Excavators, loaders, transport trucks, and compaction rollers — with qualified operators supporting project sites.

06

Materials Supply & Support

Supply of construction and infrastructure materials alongside integrated operational support for all project execution phases.

ROAD & ASPHALT WORKS

Asphalt Operations

Execution of paving, compaction, bitumen supply, and road marking with precise field coordination and specialized crews.

- 01 Earthworks & Base Layer**
Site preparation and execution of base and sub-base layers per specifications.
- 02 Tack Coat Application**
Bitumen emulsion applied to ensure adhesion between asphalt layers.
- 03 Asphalt Paving Works**
Hot mix asphalt laid at specified depths and gradients per project requirements.
- 04 Roller Compaction**
Multi-pass compaction to achieve required layer density per specifications.
- 05 Road Marking & Handover**
Traffic line painting and final surface quality verification prior to handover.

SCOPE OF WORKS

Road Works & Paving

Full scope of road works — from new construction to maintenance and rehabilitation — with specialized equipment and qualified field teams.

WORK TYPE Asphalt Paving

Construction of asphalt pavement layers per technical specifications.

WORK TYPE Road Maintenance

Patching, crack repair, and treatment of defects on existing pavements.

WORK TYPE Milling & Rehabilitation

Milling damaged layers and full pavement rehabilitation per requirements.

WORK TYPE Base & Earthworks

Subgrade, base, and sub-base layer execution per design specifications.

INFRASTRUCTURE & URBAN WORKS

Infrastructure & Urban Development

Execution of civil works supporting infrastructure and public utility projects, alongside urban development and public realm improvement works.

INFRASTRUCTURE WORKS

- Excavation and backfilling works
- Stormwater drainage systems
- Earthworks and site preparation
- Supporting civil works
- Project site development works

URBAN DEVELOPMENT WORKS

- Interlock paving installation
- Sidewalk & pedestrian pathway construction
- Concrete curb installation
- Public spaces & walkway development
- Urban enhancement works

FROM SITE TO CITY

A Complete Urban Space Ready for Use

Our urban works ensure every infrastructure project concludes with a complete, clean external space in accordance with approved specifications.

MATERIALS SUPPLY

Infrastructure Materials Supply

Supply of construction and infrastructure materials required for road and civil works projects — meeting the requirements of each execution phase in accordance with approved technical specifications.

01

Fill & Backfill Materials

Engineered fill for site leveling, structural backfill, and preparation works per design levels.

02

Base & Sub-Base Layers

Aggregate base supporting pavement layers and forming the structural foundation for roads.

03

Selected Excavated Material

Qualified soil and aggregate for bulk filling, grading, and site development requirements.

04

Filter Stone

Drainage stone for filter layers, water flow management, and structural layer stability.

PROJECT-BASED SUPPLY

Materials supply is coordinated directly with the execution plan — ensuring the right materials reach each phase at the right time.

SUPPLY SCOPE

Infrastructure Project Materials

- Quantity planning per project scope
- Phase-by-phase delivery scheduling
- Technical specification compliance
- On-site stockpile management

OPERATIONAL FLEET & EQUIPMENT

Operational Fleet & Equipment

Horizon Integration provides the equipment and machinery needed to support project execution and improve operational efficiency on site.

01

Excavators

Earthworks, site preparation, and excavation activities.

02

Loaders

Material handling and operational support within project sites.

03

Transport Trucks

Transportation of materials, aggregates, and project resources.

04

Compaction Rollers

Compaction of soil, backfill, and asphalt layers per requirements.

PROJECT OPERATIONAL SUPPORT

Integrated Operational Support

Horizon Integration provides operational support through equipment, qualified operators, and field resources to meet all project execution requirements.

- Equipment operation services
- Qualified operators
- Field support activities
- Coordination with site teams and supervisors

ENGAGEMENT OPTIONS

Daily Hire

For peak phases and short-term needs.

Monthly Contract

For ongoing projects needing continuous presence.

Project Basis

Full package from mobilization to close-out.

Qualified Operators

Experienced operators under engineering supervision.

QUALITY & SAFETY

Quality & Safety on Every Site

Horizon Integration is committed to maintaining high standards of quality and safety across all project activities by following best practices and promoting a safe and productive work environment.

- Work delivered per approved specifications and standards
- Safe working environment for all personnel
- Protection of equipment and project sites
- Operational efficiency through best practices
- Compliance with contractual obligations and schedules

WHY HORIZON INTEGRATION

What Sets Us Apart

Real field experience, qualified teams, ready equipment, and a firm commitment to quality and safety standards on every project.

Professional Field Execution

Real experience on infrastructure, road, and urban project sites.

Qualified Personnel

Specialized field teams under experienced engineering supervision.

Integrated Project Support

Equipment, machinery, and teams ready for all execution phases.

Flexible Capabilities

Adaptable to diverse project requirements with efficiency and reliability.

PROJECT GALLERY

Real Projects. Real Results.

Road, asphalt, infrastructure, and urban works delivered across multiple sites in Saudi Arabia.

OUR CLIENTS & PARTNERS

Trusted Execution Relationships

Reliable execution partnerships with companies and institutions across contracting, infrastructure, industrial, and specialized project sectors.
